

## How to Make an Egg Carton Caterpillar

### Materials:

egg carton (cut into a 3-cup strip)  
pipe cleaner (cut in half)  
scissors  
marker  
glue  
googly eyes

### Steps:

1. Gather materials.

2. Have the child draw a smile and nose, if desired, on one end of the egg carton.

3. Poke small holes where the antennae will be. From the bottom of the caterpillar, have the child put one end of the pipe cleaner in one hole and then the other end through the other hole. Curl the ends and bend them as desired.

4. Glue small googly eyes above the smile.
